

THE GLOBE-REPUBLICAN.

The FORD CO. GLOBE, Established 1871.
The FORD CO. REPUBLICAN, " 1886. Consolidated, 1889.

DODGE CITY, KANSAS, THURSDAY, JULY 12, 1900.

TWENTY-FOURTH YEAR. VOL. XXIII, NO. 40.

AGAINST THE CIGARETTE.

No One Addicted to Its Use Will Be Employed by the Rock Island.

In discussing the ban placed upon cigarettes as far as employees are concerned, Mr. A. H. Parker, vice-president and general manager of the Rock Island, said recently in an interview:

"We want to discourage cigarette smoking among our men. Cigarette smoking is a bad habit and tends to befog the mind. Experience has proven that the confirmed cigarette smoker is usually sleepy and of no account."

"The Rock Island will employ only the best men obtainable—persons with clear brains. Railroad work is exacting and requires such persons. I do not think cigarette smoking conducive to clear brains. With this in mind we now ask every applicant for employment whether he smokes cigarettes."

No man, regardless of his ability as a railroadman, can now secure a position on the Rock Island road if he is addicted to the cigarette habit. The question: "Do you smoke cigarettes?" is asked of every applicant for a place.

So far as can be learned, this is the first instance of a railroad company taking a stand against cigarettes. Officers of the other roads unanimously approve of the action of the Rock Island.

Qualifications of a Country School Teacher.

This is the last week of the county normal and next week over a hundred teachers will return to their homes to rest a few weeks before they go to work in the school room again. Many of the teachers will teach in the country. The requirements of a country teacher are not numerous. She must be primary, intermediate, grammar grade and high school teacher combined. She must be able to build fires, adjust fallen stove pipe, put in broken window panes, sweep, dust, split kindling, drive a horse, keep out of the neighborhood quarrels, know how and when to whip a bull, understand the school laws, raise money for libraries, keep all kinds of records, plant trees on Arbor day, be of good moral character and pass examinations in all branches of education.

For these accomplishments she receives thirty dollars per month. Think of a girl getting that salary! Out of that she pays her board, buys her clothes, attends summer school, buys educational books and papers, attends county conventions, and buys slate pencils for the pupils. What is left she adds to her bank account, or starts a bank, as she prefers. Unless something is done to reduce the wages, school teachers will have a monopoly on the wealth of the country, and we shall find in our midst a labor organization which shall menace our free institutions and enslave our taxpayer.—Caldwell Advance.

Good Work of Birds.

The voracious from the alfalfa attacked my 3,000 sweet potato plants in the field. I used parrot green, London purple, lime and other things, but all in vain. They would destroy about 200 plants in 24 hours in spite of anything I could do. I worked at them for about a week and was about to give up the fight, when the birds discovered them and in three days they cleaned them out. The following is a list of the birds building on our place: The thrush, turtle dove, cuckoo, blackbird, robin, oriole, kingbird, sparrow, quail, and two unknown birds.

GEORGE GOODYEAR.

Mr. Goodyear makes this practical plea for the birds, because he has had recent demonstration of their value in the preservation of his sweet potato plants. But all this only confirms what has already been known as to the value of birds as destroyers of destructive insects and worms, pests of the farmers.

But aside from their practical value in these respects, the birds should be protected for their esthetic value. Life is made more enjoyable by these sweet singers of the tree and prairie. Let them be protected.—Marion Record.

Kansas Exposition, 1904.

To Farmers, Millers and Grain Dealers: The Directors of the Kansas Exposition Association, now organized, desire to secure choice samples of wheat weighing 62 or more pounds; oats weighing 35 or more pounds, and the choicest samples of barley. These samples, of half-bushel each, are wanted to represent the State of Kansas in an exposition of the industrial progress of the State, to be held at the State Capital in 1904, it being the semi-centennial of the creation of the Territory of Kansas. Leave samples with the County Clerk of your county, who has been furnished labels for marking them. All rewards to be given to the producer. With the choice fruits of the field and shop let us make an exhibit of progress worthy of the grand Commonwealth we call home.

For further information correspond with H. M. PHILLIPS, Secretary Kansas Exposition Association, Topeka, Kansas.

EAST END NOTES.

From the Spearville News, July 9.
—Charles Lopp and Maude Davis went to Kansas City Tuesday evening for a few days' visit.

—Sam Parthmore received a new "North West" threshing machine that has the appearance of being a good one.

—Charles Stephenson has bought the Holloper house and will fit it up for habitation. He are glad of this as we do not like to lose them as neighbors even for a short time.

—Born to Mr. and Mrs. H. C. Nichols, Sunday, July 1, a boy, L. W. Nichols and J. R. Baird are both vying with Henry as to who can step the spryest this week. Cause—the youngster is the only grandson of both gentlemen.

GRAY COUNTY NEWS.

From the Cimarron Jacksonian, July 6.
—John Harper purchased the Ingalls' bridge. Just what he intends doing with it we are not advised, but he will probably offer to sell it to the county. The bridge was built in 1887 by the Ingalls Town Company. No taxes have ever been assessed against it by the county, consequently the title to the structure is clear.

—An exchange remarks that the man who gets the smallest number of letters is as a rule the one who complains most of the postoffice; the man who complains most of the preacher pays the preacher the least; the man who complains most of the home paper does the least to make the paper a success or public benefit. He says the town is no good, that it is dead. But he is mistaken, he is the corpse.

—An adjourned session of the district court was held yesterday. Hon. H. F. Mason acting as judge pro tem. The case of J. B. Taylor vs. C. H. Berry, et al., was decided in favor of the defendant. This is the case involving the title to the residence property now owned and occupied by Mrs. Dora Burns, and Mrs. Burns is receiving the congratulations of friends on the result. Sutton, Seates & Driskell and Wm. Hoover were attorneys for the defense.

—The fellow who did the burglarizing in Dodge City passed through Cimarron Wednesday night about 9 o'clock, having walked from Dodge. At A. D. Wettick's place he traded a gold breast-pin to one of the hired men for a square meal and went on his way rejoicing. Sheriff Hale and Undersheriff Bell arrived there Wednesday night on No. 1 and yesterday morning started west in search of the game. The report was going this morning that they located him near Princeville but before they could close in on him he made his escape, leaving his hat and shoes behind. This will handicap the chap and it is safe to bet he will be in the Ford county jail before many hours pass by.

From Captain to Liberal.

Chief Engineer, H. A. Summer of the El Paso & Northeastern, has completed his tour of inspecting the proposed route of extension of the Northeastern to Liberal, Kansas. It now appears that the line is to be extended from Captain to a northern connection with the Rock Island at Liberal. There is plenty of money back of the El Paso & Northeastern to construct the proposed extension from Captain to Liberal, and in fact it has always been the intention of the Northeastern people to form a northern connection with the Rock Island or Santa Fe. A junction with the Rock Island at Liberal would shorten the distance between El Paso and Kansas City 360 miles. It would be of untold benefit to Lincoln county, inasmuch as it would give us a northern market for our coal, coke, timber, cattle, and ore of gold, silver, copper, iron, lead, etc. We feel no hesitancy in saying that it is the present intention of the Northeastern people to build the road to Liberal, and when the road is completed Lincoln county will be the most favorable spot in the southwest.—Captain Miner.

Fasting seems to be the latest thing added to the list of fads. A man in New York fasted 40 days for the purpose of reducing his flesh, and now rejoices in the fact that people have quit mistaking him for an alderman. Another man who lives in New York says he got rid of a serious case of rheumatism by fasting twenty-one days. A Toledo man cured himself of gout by going without food for three weeks. A Pottstown, Pa., man is reported to have succeeded in getting a third set of teeth to grow in his gums while he was fasting a fortnight. A Buffalo man got rid of a distressing case of paresis by turning his back to the table. A Pittsburgh glass-eater, who had to retire from the show business because of chronic dyspepsia, fasted four weeks, and declares that rat-tail flies are the most enjoyable things he can find now for dessert.

Constipation is aggravated by pills. Don't take them. Take Gatlin's Anti-Bilious Compound, the only effectual cure. Free samples at drug store. For sale by all druggists.

EXTENSION OF ROCK ISLAND FROM LIBERAL TO CLAYTON.

SURVEYORS NOW AT LIBERAL.

Liberal, Kan., July 11.—The corps of Rock Island surveyors under Chief W. D. Worral, of Chicago, are in the city and will start overland west of Liberal one hundred miles where the survey of the Rock Island is made and will continue the preliminary survey to Clayton, N. M. Arrangements have been made with the Rock Island and the Northwestern & El Paso with a terminus at Capitan, N. M., to connect the roads and the surveyors are sent here to map out the road.

The present movement is no false alarm and the long talked of extension of the Rock Island will now be made. Mr. Worral informs the News correspondent that all of the grade stakes will be set as soon as possible and the grading will follow immediately.

The route will run through as fine a country man will be another outlet for the coal and iron ore mines of the Capitan mountains in New Mexico.—Hutchinson News.

Duty of a Newspaper.

Quite often we hear people say that the country newspapers are afraid to right a wrong; that they are bootlickers on the money question and that the newspaper should attack and expose anything that is not just right, regardless of circumstances.

The editor runs his paper to make a living just the same as anybody else engages in any business.

It is no more the business of a newspaper to bring out any mean contemptible act than it is the duty of any other business man or citizen. People of the community are to blame for the wrong doings, not the newspaper.

How many business men are there who will condemn an evil deed, when they know it will lose them money and likely cost them their living. The trouble is the (so called) honorable people of the town haven't the moral courage to fight a wrong, and expect the newspaper to do so for them. If the editor "scores" some one who has been doing wrong, and perhaps one who is our best patron, those who agree with us will come around secretly and put us on the back, and say we did just right, but when it comes to telling it in public they will keep perfectly mum.

If a newspaper man does a good act in fighting some of the evils of the town—instead of staying by him and upholding him to the public the citizens will invariably let him fight it out himself and usually at his own loss.

If you have any grievances make them public. If the editor attempts a reform which you know is right and a benefit to the town, give him your support publicly. Don't sit back and say a newspaper man hasn't the moral courage to say what is right until you yourself rise above the almighty dollar and stand for truth and honesty.—Ex.

Here is the latest on the editor by a youthful essayist: "Newspapers are sheets of paper on which stuff is printed. The men look over the paper to see if their names isn't in it and women use it to put on selves. I don't know how newspaper men came into the world. I don't think God knows. The bible says nothing about editors and I have never heard of one being in heaven. I guess the editor is a missing link them fellers talk about. The first editor I ever heard of was the fellow who wrote up the flood. He has been here ever since. Some editors belong to the church and some try to raise whiskers. All of them are liars, at least all I know, and I only know one. Editors never die. At least I never saw a dead one. Sometimes the paper dies and then the people feel glad, but some one else starts it up again. Editors never went to school because the never got licked. Our paper is a mighty poor one but we take it so ma can use it on our pantry shelves. Our editor don't amount to much, but paw said he had a poor chance when he was a boy. He goes without underclothes in the winter wears no socks and has a wife to support him. Paw hasn't paid his subscription in five years and says he don't intend to."

The blood is strained and purified by the kidneys. No hope of health while the kidneys are wrong. Foley's Kidney Cure will make healthy kidneys and pure blood. W. S. Amos.

A spot is most seen on the finest cloth.—Proverb.

RAILROAD NEWS.

—Switchman Glaze has returned from his eastern trip.

—A new assignment of train crews is looked for in a few days.

—On the present time card Nos. 8 and 2 carry the east-bound mail.

—F. John Luster has been appointed night yardmaster at La Junta.

—Conductor W. Scott Ammon is laying off for 60 days and DeMoss is on his run.

—Conductor Harry Norvell and wife are visiting in California.

—Two sections of No. 5 Tuesday night on account of heavy Colorado business.

—The railroad business is brisk, except in cattle shipments.

—Conductor Dalton is at home from the Democratic national convention.

—Harvey Evans is running as brakeman between La Junta and Trinidad.

—Engineer Mac Barnhart, of Pueblo, was in the city Saturday, and returned with his daughter.

—Fred Gardner, agent, is in St. Louis, since Sunday. He will return in a few days.

—Mrs. W. E. Hood, wife of Conductor Hood, and her mother, will make a trip to California, leaving here in a few days.

—Brakeman Hamilton has returned from his trip to Old Mexico, and is feeling much better in health than when he left.

—Brakeman Babcock has been laying off a few days on account of sickness in his family.

—Switchman Al. Warren, accompanied by his mother will leave in a few days for a trip to the mountains.

—Ralph Miller, son of L. R. Miller, left last night for La Junta, where he will be employed in the La Junta machine shops.

—Business is quiet on this division at the present time for the trainmen, but is good for the engineers on account of the double heading.

—The Santa Fe railway company has made arrangements with correspondence school in Pennsylvania to run their instruction cars over the lines of the Santa Fe and give instruction to the locomotive engineers and firemen in handling air brakes.

A bald head or an untidy condition of the hair causes more unhappy hours, than any other condition of life. Avoid these by using Bogg's Hair Renewer. It cures all scalp diseases, stops hair from falling out and grows hair on bald heads. Guaranteed to give satisfaction. W. F. Pine.

Card of Thanks.

The members of the Dodge City Band wish to express their thanks and appreciation to W. B. Rhodes for his kindness in furnishing the fine decorated Band Wagon on the Fourth of July.

C. M. STATES,
Secretary and Treasurer.

Krause's Little Liver Pills

are a purely vegetable, gelatine coated pill that act directly on the liver and bile. They are free from all crude and irritating matter, their action is gentle and natural and they do not cause constipation after using. Sold by W. F. Pine.

People who live on the New England coast like to use ocean driftwood as fuel in open fireplaces. It is impregnated with copper and ocean salts, and when burned gives out the most brilliant colored flames. It is asserted that a New Bedford dealer has orders for the wood from all parts of the country, and even from Europe, and ships hundreds of barrels of it yearly. Various attempts have been made to imitate this wood by artificial process, but without success. Long submersion in the sea water is necessary to produce the brilliant flames.

Answer to Prayer.

A Philadelphia woman relates the following instance of an answer to prayer: "One day I was walking on the street when I saw a runaway horse galloping toward me. The driver had lost all control over the animal, and as the wagon was swaying from side to side the driver seemed in great danger of being thrown out and severely injured, if not killed. I stepped into the street and prayed for the horse with all my might. It gave one look at me, stopped, and hung its head abashed. But that isn't all. The driver, seeing the horse was submissive, was about to seize the whip with the intention of lashing the beast, when I directed my prayers toward him. He at once gave up his cruel design, jumped from his seat, and began patting the horse's head. Then I went on my way rejoicing."

ROYAL

The Absolutely Pure

BAKING-POWDER

is the baking powder of general use, its sale exceeding that of all other baking powders combined.

Royal Baking Powder has not its counterpart at home or abroad. Its qualities, which make the bread more healthful and the cake of finer appearance and flavor, are peculiar to itself and are not constituent in other leavening agents.

Great efforts are made to sell alum baking powders under the plea that they are so many cents a pound cheaper than Royal. The admission that they are cheaper made is an admission that they are inferior. But alum powders contain a corrosive poison and should not be used in food, no matter how cheap.

ROYAL BAKING POWDER CO., 100 WILLIAM ST., NEW YORK.

At a recent school examination in an English school, H. M. Inspector put the question to a class of little girls: "Why is it that only the Queen's head appears on a penny?" "Please, sir, 'cos there isn't room for her feet."

For twenty years Bogg's German Salve has been curing obstinate cases of blind, itching and bleeding piles. It has given quick relief and a permanent cure in hundreds of cases where doctors have failed. Don't delay. Try it now and stop that suffering. W. F. Pine.

Dorothy was taking her first ride in the country, when suddenly the carriage wheels began to squeak. After a few moments she exclaimed in apparent distress, "I—I think I'd better get out, the wagon's groaning, too."—Youth's Companion.

"We have sold many different cough remedies, but none has given better satisfaction than Chamberlain's", says Mr. Charles Holzhauser, druggist, Newark, N. J. "It is perfectly safe and can be relied upon in all cases of coughs, colds or hoarseness. Sold by W. S. Amos."

Six-year-old Donald was sent to a neighbor's on an errand. When he came back he said to his mamma: "Mr. E.'s folks had company, and they were all talking in German; but I could not tell what language they were laughing in."—Youth's Companion.

"They had an eating contest the other night at Pin Hook school house."
"Who won?"
"Ben Splitters—he ate nine head of cabbage."
"Didn't it make him sick?"
"No. He just took a spoonful of Dr. Caldwell's Syrup Pepsin. That prevents Stomach Trouble of any kind, they say."—At W. F. Pine's.

The Abilene Chronicle says that a big rough-looking individual, who said he was looking for work, was approached by a farmer today who wanted to hire a man. The hobo said he had heard they were paying \$2.50 a day for hands and he wouldn't work for less than that. And yet the poor devil had to beg his dinner. People should sick their dogs on that kind of men.

We have a good sale on Dr. Caldwell's Syrup Pepsin because we guarantee it and refund your money if it does not do just as we represent it. Call for a booklet that tells you all about it, at W. F. Pine's.

A man came up to me one day after service in a frontier town, and was pleased to address me in this manner: "Say, Parson, that there service and sermon was grand. I wouldn't have missed 'em for five dollars." When I suggested that he hand me the difference between the amount he had put in the collection-box and the figure he mentioned, for my missionary work, he stopped suddenly, looked at me with his mouth wide open, and then slowly pulled from his pocket four dollars and ninety cents, which he handed to me without a word.—Rev. Cyrus Townsend Brady, in the April Ladies' Home Journal.

Unless you have tried the experiment you will be inclined to question the statement that a pane of ordinary window glass can be cut with a pair of shears if the glass is put under water during the process. It is a fact that the glass may be cut as easily as you would cut a piece of heavy cardboard. To do this successfully you must have the glass and the shears entirely under water; then clip in a curved or straight line as you prefer. So long as no portion of the glass or shears is out of water the cutting will proceed without a break. This is because the water takes up the vibrations of the glass and shears. Try the experiment and convince yourself.

Bumps and Bruises.

Sprains or sores, burns or scalds, wounds or cuts, tetter or eczema, all quickly cured by Bannor Salve, the most healing medicine in the world. Nothing else "just as good."

Saturday the dispatchers at Adams and Vinita, in the Indian Territory, had considerable trouble with the wires between these points, messages being interfered with when sent. A lineman was sent to investigate the case and he discovered something new in regard to telegraph service on the Katy. A short distance from the telegraph pole he found a large snake four feet long hanging from a wire. The snake had crawled up the pole, wound its tail around the top wire and then hung another part of its body on the lower wire. After having hung there for some time the snake was burned to death, but still hung to the wire. Not only did it become a fixture, but it formed a circuit and when a message was sent it passed along the body of the snake and was returned by the lower wire to the sender.—Coffeyville Journal.

Gatlin's Anti-Bilious Compound will cure habitual constipation and all kindred diseases, pleasant to take and very effective in results. Large boxes 25 cts., at all drug stores. For sale by all druggists.

The nomination of Stevenson by the Democratic convention was the result of a revolt of the blue-blooded silk-stockinged aristocracy of the Democracy against the domination of Populism in the party. The Democrats have always entertained a secret contempt for their Populist allies, and the taunt hurled back in answer to the cries of "Towne" in the convention yesterday that "this is not a Populist convention" gave the keynote to the opposition to the Populist candidate that resulted in the nomination of Stevenson. The Democrats have use for the Populists, but it is as voters and not as companions and equal partners that they want them. The Democrats look upon the Populists the same as the Southern planter did his negro slave—as the means through which he might obtain wealth and power, not as his companion or equal.—Hutchinson News.

If you are sick all over, and don't know just what ails you, it's ten to one your kidneys are out of order. Foley's Kidney Cure will bring you health and energy. W. S. Amos.
